will be South the same day : Then look for the Haven or Port, you desire, and where the Hours and Quarters stand before the same, there it is High-Water for many Hours and Quarters before the time above found ; But where the Hours and Quarters stand after the Place, there it is High-Water to-long after the time left found.

As for Example.

The Second is of the Antipodes.

The Moon being five days past the Change, and so five days old, I found in the Table, that five days after the Change the Moon is South at four a clock, which makes Pull Sea at *Quinnborough*, *Salem*, &c. But at *Yarmouth* *Dover*, *Harwich*, an hour and an half sooner; I there find, that the Moon is South at three a clock in the Afternoon, but at *London*, *Timons*, and *Amsterdam*, three hours later: And more than that, at *Paris*, *Brussels*, *Amsterd.* &c. is South in the Evening.

The Third will be of the Moon, in the 15
of Capricorn on June the 26, about
eight; it will be but a small Eclipse, yet
be seen by any diligent observer.
